WHAT WAS DONE

- Paper levelled and toned to the studio standard: level 235.31, warmth 31.0.
- Scanner edge removed: top 0, bottom 0, left 0, right 0 px. No mount board: the sheet was scanned on its own.
- The printed line deepened by a monotone tone curve; ink area changed by 1.0× — the lines are darker, not thicker.
- Owner marks: No stamps or pencil marks were removed from this sheet. One candidate mark sits on the margin outside the delivered frame, and nothing was retouched over the printed ink. The frame is identical to the source

scan, so no scanner edge was trimmed.

WHAT WAS NOT DONE

- no map content added, removed or redrawn
- no retouching over printed ink
- no change of proportions
- no global filter
- paper neither bleached white nor tinted
- authenticity marks kept: plate mark, deckle edge, honest patina

Six print files and this passport, 354 MB in total, delivered as six separate ZIP archives (one print file, the passport and a READ ME in each). Nothing else: the catalogue previews and the 1:1 detail crops shown on the shop page are not padding out this archive — any crop you want is already inside the full-resolution file.

Largest print at 300 dpi: 93.3 × 52.9 cm. At 240 dpi: 116.6 × 66.2 cm. At 200 dpi, still sharp on matte paper at arm's length: 139.9 × 79.4 cm.
